

Semi- Annual Routine Chlorine Conversion

The Village of Surfside Beach receives water from the city of Freeport which receives water from the Brazosport Water Authority (BWA).

Starting Wednesday, June 5th thru June 26th, BWA will be conducting their TCEQ approved system free chlorine conversion.

During this time you will notice a change in taste and smell. (Higher levels of free chlorine).

The water is still safe for consumption.

Although this is “new” for Surfside Beach, this is common practice for other water authorities who use Total Chloramines as the disinfectant for water treatment.

Any concerns or questions please call: Erick Ingram – PW Director – 979-480-3522
